

Product Specification

Product Title	BURGER DISCS 4" 5000 DISCS BOX
Product Code	MP30013D

Material	Biaxially Oriented Polypropylene (BOPP) Film		
Packed	In 1kg boxes and then cased in to boxes of 6kg		
Sheet Size (mm)	n/a	Thickness (μ)	20-50mu
Disc Size (")	4" (102mm)	Treated	Gloss Layer

Material	Co-extruded biaxially orientated polypropylene (BOPP) transparent film, sealable on both sides. Typical applications include rotogravure and flexographic printing, lamination, single web structure, HFFS & VFFS packaging and general over wrapping of products. Suitable for use in applications where barrier property to water vapour, oxygen and aroma are required.
Limitation of Use	BOPP film is suitable for standard ambient flexible packaging applications. Not suitable for microwave, retort, sterilization, irradiation or conventional cooking processes.
Recycled Material Content	No post-consumer recycled content is used.
Compliance with Food Contact Legislation	We certify that the above products are manufactured to comply with the following EU and British legal requirements and the relevant country of manufacture: <ul style="list-style-type: none"> • The Regulation (EC) No. 1935/2004 and amendments of the European Parliament and of the Council of 27 October 2004 on materials and articles intended to come into contact with food • The Commission Regulation (EC) No. 10/2011 and its successive amendments including 2016/1416; 2017/752; 2018/79; 2018/213; 2018/831; 2019/37; 2020/1245 • The Regulation (EC) 2023/2006 and amendments good manufacturing practice • The Commission Regulation (EC) No. 1895/2005 on the restriction of use of certain epoxy derivatives in materials and articles intended to come into contact with food • The Materials and Articles in Contact with Food (England) Regulations 2012 • The Food Safety and Hygiene (England) Regulations 2013
Compliance with Migration Testing	The materials have been tested in accordance with the requirements of EC 10/2011 and relevant amendments with regards to overall migration limits. Overall migration limits are within the specified limit of 10mg per 1 dm ² for a cubic packaging containing 1kg of food to a migration of 60mg per kg of food.
Heavy Metals	Our suppliers state that cadmium, chromium (hexavalent), mercury and lead are not intentionally added during product manufacture. Any incidental amounts would not exceed 100 ppm by weight.
BADGE / BFDGE / NOGE	Our suppliers state that epoxy resins used during manufacture are approved and comply with the Union List of Authorised Substances EC 10/2011 and EC 1895/2005 and all relevant amendments.
Allergens	Our suppliers state that the current list of 14 known allergens are not intentionally added during product manufacture.
REACH / SVHC	Our suppliers state that substances are regularly reviewed against the current Candidate List and are not intentionally added during product manufacture.

Individual film manufacturers' material specifications; food contact QC/migration results and limits; dual use additives; heavy metals; phthalates; epoxy resins used/added during manufacture are available on file (copies of which are available upon request) for each film grade supplied.

While we have taken all reasonable steps to verify the accuracy of the information contained in this specification, no warranties are given to this effect and purchasers should determine for themselves whether products are suitable for their own specific use. The information contained in this specification is intended for the customer it has been issued to. It must not be reproduced, or the information contained therein passed on to any third party without the written consent of Scobie & Junor.

Product Specification

Note: Subject to a 1% tolerance for defective cuts. This version becomes expired when a new issue is generated, the SoC is reviewed annually as a minimum. Where BOPP films are further converted by printing and / or lamination using different printing inks, adhesives, varnishes and other substrates, it is the responsibility of the 3rd party converter to determine and satisfy the suitability for food contact regulatory compliance of the converted film; as this conversion process is outside the Company's control, we cannot accept liability in connection with regulatory compliance / suitability of the converted product.

The above stated material is intended for direct food contact; however, it is the responsibility of the end-user to verify its suitability for its intended food application.

Customer Approval of Specification	
Please sign and return this specification to technical@scobie-junor.co.uk to confirm formal acceptance of this specification. All specifications issued will be deemed to be accepted if no communication to the contrary is received after 10 working days.
